Giandomenico Sica, Chairman of the Board of Directors of DHH, commented: *“This semester is the first one where the results of Seeweb have been officially and fully included in our consolidated profit and loss. This is the reason behind the strong - triple-digit - performance that can be observed on all the main indicators in this period. The fact that the new size of our group is evident in the official results and no more only in the pro-forma ones will help in the coming quarters to improve our positioning and visibility in terminals like Bloomberg, which are used by institutional investors to find new companies or to check multiples and performances of the ones they are interested in. On the business side, if we consider the organic - like for like - results, we see that in this semester our group grew on all the main KPIs - revenue, EBITDA and net profit -, with a strong cash generation supported by a business that is grounded on recurring - Software as a Service and Infrastructure as a Service - revenue and a low level of indebtedness, confirming the trend we have in place since the foundation of DHH, which shows our management philosophy oriented towards the improvement of the business KPIs in each period. In the first six months of the year, we also executed two small acquisitions, one in Croatia (Optima Hosting) and the other one in Italy (Mondoserver), thus consolidating our presence in the market. Last, but not least, through our portfolio company Seeweb we promoted the launch of the Consorzio Italia Cloud. “Consorzio Italia Cloud” brings together some of the most important companies in Italy in the area of Cloud Computing. The main objective is to support the government and the public administration in its journey towards digitization and cloud adoption within a framework of secure and resilient use of domestic technologies and expertise coming from the industrial and research sectors as envisaged in the PNRR (Piano Nazionale di Ripresa e Resilienza).”*
